

Multi-model AMICA (n_models=2): pyAMICA vs Fortran ensembles, real sample EEG

Dashed vertical lines mark each distribution's mean.

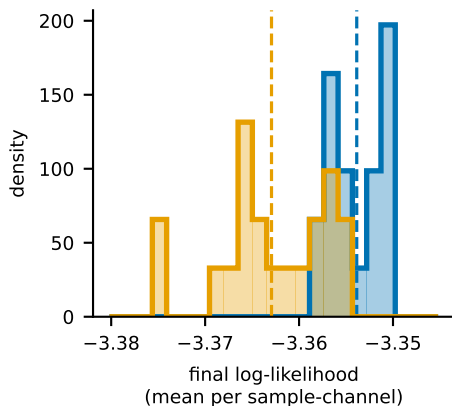

A Partition-agreement distributions

within-Fortran
within-pyAMICA
between (pyAMICA-Fortran)

mean corr. (run pairs)
within-Fortran: 0.638 (n=190)
within-pyAMICA: 0.661 (n=190)
between: 0.649 (n=400)
diff: +0.011 (margin +/-0.05)
perm. p=0.96

B Likelihood distributions

Fortran
pyAMICA

mean final LL
Fortran: -3.3539 (sd 0.003)
pyAMICA: -3.3629 (sd 0.006)
gap: 0.009 (100-iter budget)
KS p=6e-05
